fellowship-trained spine surgeon

- Minimally Invasive Surgical Techniques
- Individualized Treatment Plans
- Pioneers in New Techniques and Technologies
- Home of the San Diego Spine Fellowship Program

SAN DIEGO CENTER FOR SPINAL DISORDERS

MEDICAL GROUP, INC.

Celebrating 20 years of spine care excellence

The San Diego Center for Spinal Disorders is the oldest free standing spine center in the San Diego area. For over 20 years we have provided comprehensive spine care to local, national and international pediatric and adult patients with spinal disorders.

Established by Medical Director, Behrooz Akbarnia M.D., the San Diego Center for Spinal Disorders has become a leader in research and education as well as training orthopaedic surgeons to become spine surgeons. Today, our group includes three established, fellowship-trained spine surgeons and a team of other spine specialists who work in concert to establish the appropriate treatment program for each patient.

Welcoming Gregory Mundis, MD

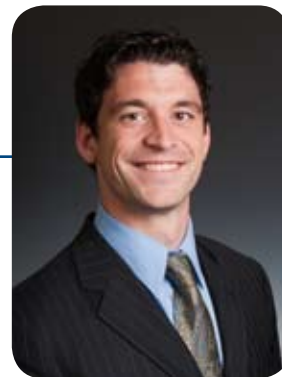

*Medical Degree: University of Missouri, Columbia
Orthopaedic Residency: Oklahoma University Health Sciences Center
Spine Fellowship: San Diego Center for Spinal Disorders*

Dr. Mundis is the newest Orthopaedic Surgeon specializing in spine surgery at the San Diego Center for Spinal Disorders. As a Fellow under the direction of Dr. Behrooz Akbarnia, Dr. Mundis has focused his training to subspecialize in Adult and Pediatric Deformity surgery as well as in **cervical spine surgery**.

Research is very important aspect of Dr. Mundis' practice, as he feels the study of patients and their outcomes will lead to improvements in care delivery. As such, he is an active

member of several international research teams that are composed of the leading physicians in adult and pediatric spinal deformity surgery.

Dr. Mundis has had a productive **academic** year, completing two book chapters on early onset scoliosis, publishing an article on adult scoliosis, presenting his research in Vienna, Austria at the 16th International Meeting on Advanced Spine Techniques and the Spinal Research Society's annual meeting in San Antonio, Texas.
